2020-2021 Issue 31

Principal Message

This year we started incorporating more Global Citizenship and 21st Century skills into students' lessons with project based learning. It started this year with Grade 5's human impact and pollution project. During April PD day teachers from Grade 1-5 came together to plan how to continue to incorporate these types of lessons into the 2021-2022 school year. Teachers began to modify current unit plans to make them more projected based and plan for a "Week Without Walls" experience. Having students engaged in selecting their own learning process is the best way to engage them in their own learning. We know that struggling with understanding knowledge is better than just giving them the knowledge so that they can give it back. Project Based learning is the best way to accomplish this task.

The school year comes to an end, attendance is important and students should try their best to be on time in attending their daily classes.

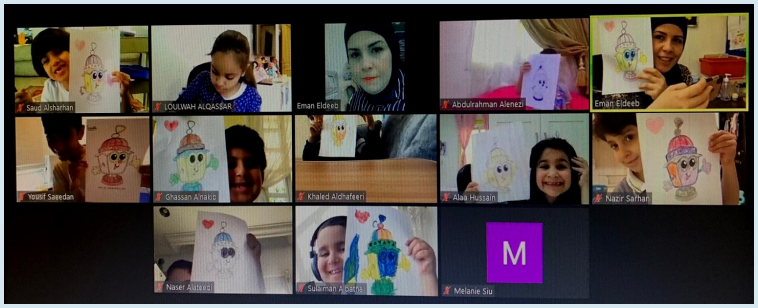

Ramadan Kareem Message

Reminder that students should be mindful of those who are fasting. Parents can reach out to their child's homeroom teacher for the specific grade level expectations.
